- Only 86 mm depth
- 2 separate 100 V transformer and 2 x 6 W speaker
- Quick-mount
- Certified according to EN 54-24
- Compliant with BS-5839-8

Specifications

A&E specifications

A/B ceiling mounted loudspeaker with two separate loudspeakers and two separate 100V transformers to completely separate the A and B loudspeaker lines. Cost-saving installation of a speaker by an A/B wiring instead of installing two speakers. Steel housing. Cable connection via two ceramic terminals with integrated thermal fuse.

The loudspeaker must be certified by a notified body in accordance with EN 54-24. The loudspeaker must meet the requirements of BS 5839-8.
