Manual Call Point

The Manual Call Point is a high-quality, intelligent fire alarm activation device designed for quick and effective emergency response.

It integrates with conventional fire alarm control panels and ensures reliable operation with its reusable lever mechanism.

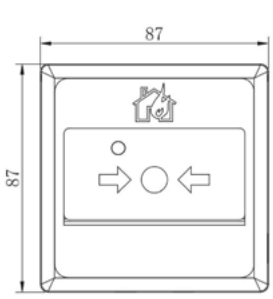

With a clear LED status indicator and durable construction, it is an ideal solution for fire safety systems in various environments.

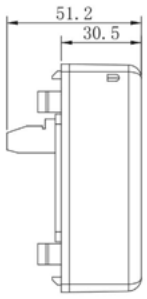

Features

- **Semi-flush or Surface Mounting** - Easy installation options for different setups.
- **EN54-11 Compliant** - Meets the latest European fire safety standards.
- **Reusable Lever Design** – No need to replace glass after activation, ensuring long-term use.
- **LED Indicator** - Blinking light for normal operation; stays lit during alarm conditions.
- **Durable Build** - Made of high-quality ABS material for longevity.
- **Easy Wiring** - Supports a two-wire bus system for efficient connectivity.

Applications - Commercial Buildings, Industrial Facilities, Educational Institutions, Public Spaces & Residential Complexes.
