Model

GC-36

The NIBBLE GC-36 module was developed taking into account security and remote maintenance needs. Therefore, the module can operate completely by itself providing remote maintenance functions, automatic output actuation (actuation on incoming call and on input changes) and automatic input alerts (SMS and audio).

Technical Details

- 2×16 LCD and capacitive keypad;
- 6 bidirectional input/outputs;
- Micro-USB;
- 150 users;
- SMS and voice message alerts for each input;
- Periodic test calls;
- Disarm code;
- Access levels 2 and 3;
- Output actuation with input changes:
- Output actuation with costless phone call;
- Tamper detection;
- Power supply failure detection;
- Internal antenna (optional external not included);
- Backup 9V battery Ni-MH (not included).
