L-OP-SG

WIRELESS (LIBRA) DUAL OPTICAL SMOKE DETECTOR

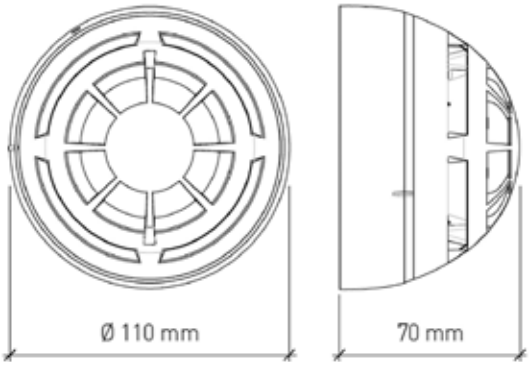

The L-OP-SG wireless dual optical smoke detector is the latest in wireless smoke detector technology. It is a fully intelligent device and compatible with all Argus wireless Translator and Expander modules. The detector is designed for open area protection and utilises dual-path optical smoke detection technologies and algorithms for improved performance, whilst maintaining the high levels of unwanted alarm rejection. Utilising well-proven adaptive radio signal processing algorithms ensure the highest levels of life safety and system reliability are achieved. An in-built magnet test allows easy activation to verify correct functionality and response.

COMMUNICATION QUALITY ASSESSMENT

It is possible to assess the wireless communication quality between the device and translator or expander using the built in test facility. After successful programming of the device, changing the "Program" switch to the "ON" position will set the device into test mode and the LED will start blinking according to the table below:

Communication Quality (dB)	Level	Green LED	Red LED
No connection	Fail	-	Two flashes
Link margin is less than 10 dB	Poor - not acceptable	-	One flash
Communication with link margin from 10 dB to 20 dB	Medium/Low - not recommended	One flash	-
Communication with link margin from 20 dB to 30 dB	Good	Two flashes	-
Robust communication with link margin over 30 dB	Excellent	Two flashes	-
