NUKI OPENER

DATA SHEET

SMARTEN UP YOUR INTERCOM

The Nuki Opener turns existing intercoms into smart entry systems. In combination with the Nuki Smart Lock, it grants residents completely keyless access from the street to their flat. The Nuki Opener triggers the door buzzer, and is designed to be a retrofit solution. It takes less than 15 minutes for the resident to install the Nuki Opener. Power is provided either by four AAA batteries or a 5V Micro-USB port.

ADVANTAGES:

- Enables keyless access to multi-party buildings
- Easy self-installation in less than 15 minutes
- Time-frames in which the Nuki Opener automatically opens the door by ringing the doorbell, can be set.
- Can also be controlled remotely
- Completely keyless experience from the street to your home – in combination with the Nuki Smart Lock

TECHNICAL DATA

Weight:
115 g

Dimensions:
70 x 70 x 25mm

Power supply:
4 AAA batteries *or*
5V (Micro-USB)

Communication:
Bluetooth 5

Security:
End-to-end encryption

Requirements:
Electronically controlled locking system
Compatible intercom system
Nuki Bridge

Features:
Open door,
Ring to Open,
Continuous mode,
Ring suppression
