WS4-PS5

METAL ENCLOSURE WITH POWER SUPPLY

WS4-PS5 is a universal metal enclosure, specially created for our Web Access products, with power supply included.

It can be used to include more than one Web Access product inside, like two webserver controllers or two relay boards to work with the webserver controller.

So there is no need to have a different enclosure for each new product that you want to add to your webserver installation.

SPECIFICATIONS

- Input voltage: 100-240 VAC; 50/60 Hz
- Output voltage: 15 VDC
- Output current: Maximum 5 A
- IP factor: IP30
- Dimensions: 356 x 90 x 325 mm

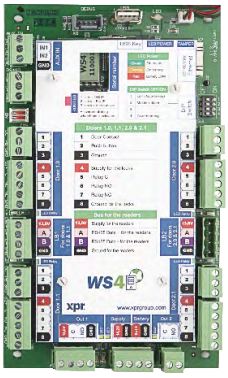

* To use only with our WS4 controllers, relay boards and extender
